

Manda Sai Durga Prasad Java Full Stack Developer

✉ saidurgaprasad44@gmail.com 📞 9059706133 📍 Hyderabad

Summary

Java Full Stack Developer with **5 years and 6 months** of experience in enterprise application development. Proficient in building and maintaining web applications, troubleshooting **production issues**, and performing **root cause analysis**. Experienced working in **Agile Scrum** teams to deliver stable and scalable solutions.

Professional Experience

Tata Consultancy Services LTD. (TCS), Systems Engineer
02/2022 – Present

Java Full Stack Developer & Application Support (L3):

- Built and enhanced backend modules using **Java, Servlets, Spring framework, Spring Data JPA, REST APIs**, and **Oracle SQL**.
- Improved UI workflows by enhancing **JSP, HTML, CSS, JavaScript, ReactJS** components.
- Delivered **logic improvements, bug fixes**, and **feature extensions** across various modules.
- Performed deep **RCA, log analysis**, and **code debugging** to resolve recurring and high-impact issues.
- Analyzed and optimized **end-to-end workflows**, contributing to smoother business operations.
- Coordinated deployments using **Azure DevOps CI/CD**, validating builds and post-deployment functionality.
- Handled **Incident, Problem**, and **Change Management** activities via **ServiceNow**.
- Actively participated in **Agile Scrum** rituals—**daily stand-ups, sprint planning, refinements**, and **retrospectives**.
- Conducted **impact analysis**, prepared **test validations**, and ensured smooth movement across environments.
- Authored reusable **knowledge articles** and **troubleshooting guides**.
- Managed multiple **high-priority issues** independently under time-sensitive conditions.

Infosys, Testing Executive
07/2018 – 10/2019

Software QA Engineer (Manual Testing & Defect Validation):

- Performed **manual functional testing** by executing detailed test cases and verifying business workflows end-to-end.
- Identified, documented, and validated defects, providing clear reproduction steps and collaborating with developers for timely resolution.
- Conducted regression testing, integration testing, and user-flow validation to ensure application stability after fixes and enhancements.
- Reviewed requirement documents and translated them into structured test scenarios and test cases.
- Logged and tracked defects using the project's defect **management tools**, ensuring accurate status updates and closure within timelines.
- Gained strong understanding of application functionality, data flows, and defect patterns — a foundation that strengthened later work in debugging, RCA, and application support.
- Participated in **sprint activities, daily stand-ups**, and **test planning** discussions to support **Agile delivery cycles**.

Technical Skills

Programming & Backend Development

- **Core Java:** Java (versions 8, 11, 17), Servlets, JDBC
- **Spring Framework & Ecosystem:** Spring Boot, Spring MVC, Spring Data JPA, REST APIs (Spring & Jersey)
- **Build tools & Servers:** Ant, Maven, Apache Tomcat

Database & Querying

- **Systems:** Oracle, PostgreSQL
- **Skills:** SQL, Joins, CRUD Operations, Data Debugging & Optimization

UI & Frontend Development

- **Technologies:** React, JavaScript (ES6+), HTML5, CSS3, JSP

DevOps, Version Control, Deployment

- **Azure DevOps:** CI/CD Pipelines (Build & Release) Repositories, Branching & Merge Management Boards, Work Items, Sprint Planning & Card Management
- Git, GitHub
- WinSCP, PuTTY

Application Support & Debugging

L2/L3 Production Support, RCA, Log Analysis & Troubleshooting, Incident / Problem / Change Management (ServiceNow)

Tools & IDEs

Eclipse, Spring Tool Suite (STS), VS Code, Postman, pgAdmin 4, Oracle SQL Developer

Operating Systems

Windows, Linux, Unix

Additional Skills (Learning Knowledge)

- Python (Core)
- Django Framework — understanding of MVT, views, models, routing

Professional Achievements

- **Delivered multiple code fixes and enhancements** across various modules, addressing recurring logic issues and improving application stability.
- **Improved platform reliability by maintaining 99.7%+ uptime and resolved major data inconsistencies across modules**, cutting incident volume by 35% and ensuring uninterrupted business operations.

Awards

Quick Learner Award – TCS (Project-Level Recognition)

- Awarded across the project for quickly understanding complex application components, adapting to new technologies, and contributing effectively in a short time.

Education

Master of Computer Application,
Sri YN College, Adikavi Nannaya University
10/2019 – 10/2021 | Narsapur, AP, India
