MANDA SAI DURGA PRASAD

Java Developer | Production Engineering

Hyderabad, India | +91 9059706133 | saidurgaprasad44@gmail.com | linkedin.com/in/sdp1105 | github.com/saidurgaprasad44

PROFESSIONAL SUMMARY

Java Developer with **4+ years** at TCS building, stabilizing and extending **Java/Spring Boot** applications on **Oracle** and **PostgreSQL** in Azure-hosted environments. Lead **P1/P2** incidents from triage through root-cause analysis and corrective action, with a focus on application reliability and recurring-issue prevention. Build and maintain **REST APIs** and ship releases through **Azure DevOps CI/CD** with **Docker**. Combines backend engineering with production troubleshooting to improve application stability and operational reliability

TECHNICAL SKILLS

Languages: Java 8/11/17/21, SQL

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Spring Cloud, Spring Framework (Core), Hibernate/JPA, JDBC, JAX-RS

Production Engineering & Observability: Production incident management (P1/P2), root cause analysis (RCA), log analysis, application troubleshooting, production support, Prometheus, Grafana, Loki, ServiceNow

Databases: Oracle, PostgreSQL

APIs & Distributed Systems: REST APIs, Microservices, Event-Driven Architecture, Apache Kafka, Redis, caching, scalability, resilience

Security: Okta, SAML, OAuth2/OIDC, JWT, RBAC, SSL/TLS, Java keystores and truststores (.jks)

Web: Servlets, JSP, HTML, CSS

Cloud & DevOps: Microsoft Azure, Azure DevOps (Pipelines, Boards), CI/CD, Docker, Docker Compose, Maven, Ant, Git, Tomcat, WebLogic

Operational Tools: Postman, Eclipse, Spring Tool Suite, VS Code, IntelliJ

PROFESSIONAL EXPERIENCE

Systems Engineer (Java Developer) | Tata Consultancy Services (TCS) — Feb 2022 – Present

- Deliver backend enhancements/features and **change requests (CRs)** in **Java** and **Spring** across enterprise applications.
- Designed and built a new **REST integration** between two enterprise systems; maintained **REST** and **SOAP APIs**, including payload transformation and data mapping for reliable data exchange.
- Resolve persistence-layer defects by analyzing **Hibernate** entity mappings and **Oracle SQL** queries, tracing data discrepancies and shortening defect turnaround.
- Integrated applications with **Okta** using **SAML** and **OAuth2**; restructured authentication flows for stronger security and login reliability; manage **SSL/TLS** renewals, truststores and Java keystores **(.jks)** on **Azure VMs**.
- Own **P1/P2 production incidents** on Azure-hosted **Java/Spring** applications, correlating **Loki** logs with **Prometheus** and **Grafana** to isolate application, database or infrastructure causes and drive fixes that prevent recurrence.
- Sustained **99.7%+ uptime** across enterprise CPG modules and cut recurring production tickets by **35%** by tracing and resolving underlying data inconsistencies.
- Enhanced and maintained Java backend components using **Apache Kafka** for event-driven communication and **Redis** for caching, addressing defects and improving application reliability.
- Build with **Maven**, containerize with **Docker** and deploy through **Azure DevOps pipelines** with **Git** branching, coordinating production releases.
- Work in **Agile/Scrum** with infrastructure, QA and business teams, tracking work in **Azure DevOps Boards** and **ServiceNow** and flagging technical and operational gaps in daily stand-ups.

Testing Executive (QA Engineer) | Infosys — Jul 2018 – Oct 2019

- Executed manual testing and defect validation for enterprise applications against business requirements.
- Clarified requirements with business and development teams in Agile ceremonies, building the defect-reproduction habits now applied to production triage.

EDUCATION

Master of Computer Applications (MCA) | Adikavi Nannaya University (Sri YN College, Narsapur) — Oct 2019 – Oct 2021

AWARDS

- Quick Learner Award, TCS: delivered backend fixes on complex enterprise frameworks within the first onboarding sprint.
