

Manda Sai Durga Prasad Java Full Stack Developer

✉ saidurgaprasad44@gmail.com 📞 9059706133 📍 Hyderabad 🌐 <https://github.com/saidurgaprasad44>

Summary

Result-driven **Java Developer** with **5.5 years of experience** designing, developing, and maintaining scalable enterprise web applications. Proficient in building robust backend ecosystems using **Spring Boot and Microservices**, coupled with modern ReactJS frontends. Adept at streamlining delivery pipelines via Azure DevOps CI/CD, performing complex data optimization, and conducting deep root-cause analysis (RCA) in Agile Scrum environments

Professional Experience

Tata Consultancy Services Ltd. (TCS) | Systems Engineer / Java Developer

02/2022 – Present

- **Application Development & Enhancements:** Designed, coded, and deployed modular feature extensions and Change Requests (CRs) using **Java 8/11/17, Spring Boot, and Microservices**.
- **RESTful API & System Integration:** Designed and managed robust **RESTful APIs** to streamline secure data transmission to downstream applications; engineered complex payload data transformations and payload structural updates to ensure seamless cross-system integration.
- **Full-Stack & ReactJS Integration:** Built responsive interfaces by aligning backend services with component-driven **ReactJS** frontends, handling data-binding, state consumption, and asynchronous APIs.
- **Codebase Refactoring & Troubleshooting:** Performed deep-dive root cause analysis (RCA) on production bottlenecks, optimizing inherited code and refactoring endpoints to boost throughput.
- **Data Modeling & ORM Integration:** Managed data layers via **Spring Data JPA** using entity mapping, normalization principles, and **Oracle SQL joins** for debugging.
- **Continuous Delivery & Version Control:** Executed automated deployments and managed code versions through **Azure DevOps CI/CD pipelines** to eliminate manual delivery errors.
- **Agile Team Collaboration:** Engaged in code reviews, technical debt reduction, and daily Scrum ceremonies to ensure software updates met architectural standards.

Infosys | Testing Executive / QA Engineer

07/2018 – 10/2019

- **Quality Assurance & Defect Validation:** Executed manual functional and end-to-end integration tests across business-critical applications to ensure code quality prior to production deployments.
- **Agile Testing & Alignment:** Translated complex requirement documents into technical test scenarios and tracked software defects via management tools.
- **Analytical Foundation:** Gained heavy exposure to data flows, exception handling, and application behavior—building a solid diagnostic foundation leveraged in subsequent full-stack engineering roles.

Technical Skills

Programming & Backend Development

- **Core Java:** Java (versions 8, 11, 17), Servlets, JDBC
- **Spring Framework & Ecosystem:** Spring Boot, Spring MVC, Spring Data JPA

Microservices & Distributed Systems

Microservices Architecture, Service Discovery (Eureka), API Gateway, RESTful Web Services (Spring REST & Jersey)

UI & Frontend Development

- **Technologies:** React, JavaScript (ES6+), HTML5, CSS3, JSP

Database & Querying

- **Systems:** Oracle, PostgreSQL
- **Skills:** SQL, Joins, CRUD Operations, Data Debugging & Optimization

DevOps & Tools

- Azure DevOps (CI/CD Pipelines, Repos, Boards), Git, GitHub, Maven, Ant, Apache Tomcat

Methodologies & Tools

Agile/Scrum, ServiceNow (Incident & Change Management), Log Analysis (Splunk), Postman, STS, Eclipse, VS Code

Additional Skills (Learning Knowledge)

- Python (Core)
- Django Framework — understanding of MVT, views, models, routing

Professional Achievements & Awards

- **Feature Delivery:** Successfully engineered and pushed multiple application feature extensions ahead of schedule, validating stability across staging environments
- **System Reliability:** Maintained an optimal **99.7%+ system uptime** for enterprise modules by debugging structural data inconsistencies, resulting in a **35% drop in recurring production tickets**
- **Quick Learner Award (TCS):** Received project-level recognition for rapidly mastering complex project frameworks and contributing backend fixes within minimal onboarding timelines

TECHNICAL PROJECTS & REPOSITORIES

Java & Enterprise Architecture Knowledge Base |

<https://github.com/saidurgaprasad44/Java-Full-Stack> 📄

- Compiled an extensive repository detailing **Microservices design patterns, Spring Boot configurations, and RESTful API integrations**.
- Documented proof-of-concept implementations for **Service Discovery (Eureka), API Gateways**.
- Maintained structured architectural deep-dives and technical references for modern enterprise Java development.

Education

Master of Computer Application,

Sri YN College, Adikavi Nannaya University

10/2019 – 10/2021 | Narsapur, AP, India
